**3-A® Sanitary Standards for Multiple-Use Plastic Materials, Number 20-27**  
protocol and meets its requirements

Results of tests are stated in the following Test Reports :

- Report No. ENB016046P-2 dated 18<sup>th</sup> September 2013
  - Cleanability Response Testing
  - Product Treatment Testing
  - Cleanability Comparison

**Notes**

It remains the responsibility of the customer use the plastic article manufactured from the product into the intended use, to assess the final suitability of the plastic material for the intended application . i.e. checking if the physical properties of plastic material make it suitable for the intended application, checking compliance of the finished plastic article with the relevant limits, checking for possible influence of the plastic material on the composition etc.

- The articles shall be thoroughly cleaned prior their first use.
- It is the responsibility of the buyer to assure traceability of the material during any further downstream use up to and including the finished machined part as well as the equipment in which it is assembled.

These tests on representative samples may not reflect results on articles made from these materials, especially if other substances are added during fabrication.

Testing of the finished article is the responsibility of the manufacturer or seller of the finished product if certification that meets 3A standards is required.

**Note No. 2 : The customer must always specify in the Orders when an approval / certification stated in this document is necessary. This because the approved material follow a different internal procedure with respect to the standard material.**

**Note No. 3 : the present declaration It is not valid unless accompanied by a certificate showing the identification ( Lot No. ) of material supplied.**
